<p>Today in 1896, the Dow Jones index was first launched. Dow became the primary U.S. stock exchange indicator. And although it has grown more than 1000-fold in about a hundred years, an old-school cypherpunk won't be amazed by such a childish price rise. We are certainly here for the technology, but who's met a bitcoiner complaining about a 12 million percent rise? In general, the point is that this is just the beginning, and all you have to do is keep an eye out. So it's time to check out the digest!</p>	Internal	Passing Juice

A cypherpunk is any activist advocating widespread use of strong cryptography and privacy-enhancing technologies as a route to social and political change. Originally communicating through the Cypherpunks electronic mailing list, informal groups aimed to achieve privacy and security through proactive use of cryptography. Cypherpunks have been engaged in an active movement since the late 1980s.	Internal	Passing Juice
