		description La calvizie è un problema estremamente diffuso tra uomini e donne. Esistono vari tipi di intervento, ma l'autotrapianto di capelli rappresenta in molti casi l'unico trattamento valido per la soluzione del problema. Consiste nel prelevare i capelli dalla zona occipitale (nuca) del soggetto e reimpiantarli come mini e micro innesti nelle zone dove non sono presenti. L'incisione nucale guarisce bene e, una volta ricoperta di capelli, risulta ben nascosta. I mini innesti hanno 3 o 4 follicoli con i relativi capelli, mentre i micro innesti 1 o 2 al massimo. La possibilità di usare gli uni o gli altri e la loro distribuzione, è dettata dall'esperienza del chirurgo. L'intervento viene effettuato in anestesia locale, dopo avere eseguito degli esami clinici e dura 3 o più ore. Nei casi di calvizie particolarmente estesa è preferibile dividere il trapianto in due o più sedute per ottenere un effetto estetico migliore. Subito dopo l'intervento si applica un bendaggio da lasciare indisturbato per 2 o 3 giorni. Una valutazione definitiva e corretta dell'intervento può essere effettuata nel giro di alcuni mesi, cioè il tempo necessario per una buona ricrescita. L'autotrapianto, effettuato con tecniche moderne, è un metodo sicuro ed efficace e assicura risultati duraturi. &nbsp; title TRAPIANTO DEI CAPELLI

	Speed Tips	 Excellent, your website doesn't use nested tables.  Too bad, your website is using inline styles.  Too bad, your website has too many CSS files (more than 4).  Too bad, your website has too many JS files (more than 6).  Too bad, your website does not take advantage of gzip.

Mobile

	Mobile Optimization	 Apple Icon  Meta Viewport Tag  Flash content
--	---------------------	---

Optimization

	XML Sitemap	Missing Your website does not have an XML sitemap - this can be problematic. A sitemap lists URLs that are available for crawling and can include additional information like your site's latest updates, frequency of changes and importance of the URLs. This allows search engines to crawl the site more intelligently.
	Robots.txt	Missing Your website doesn't have a robots.txt file - this can be problematic. A robots.txt file allows you to restrict the access of search engine robots that crawl the web and it can prevent these robots from accessing specific directories and pages. It also specifies where the XML sitemap file is located.
	Analytics	Missing We didn't detect an analytics tool installed on this website. Web analytics let you measure visitor activity on your website. You should have at least one analytics tool installed, but It can also be good to install a second in order to cross-check the data.
