- [H2] Can you give us a little history of KAVA?
- [H2] Could you please tell me what KAVA cryptocurrency is? What problem does it solve?
- [H2] What is the advantage of keeping the KAVA token for a long and short term?
- [H2] Chainlink is KAVA's partner, can you explain more about this partnership?
- [H2] What is the KAVA CDP product? Do you have any exciting things down the pipeline that you can share?
- [H2] Why should BNB users use KAVA's lending platform and take out USDX? And how to mint USDX with BNB on KAVA CDP?
- [H2] Brian do you have any more information or links for our community about this?
- [H2] KAVA was initially planned to launch on Ripple network but later switched to Cosmos Tendermint Core. is that something you see in Tendermint Core that is not available anywhere?
- [H2] KAVA does cross-chain support. Compared to other DeFi platforms, KAVA offer collateralized loans and stable coins to users too. How will volatility be managed there with so many different collateral systems in CDP?
- [H2] Recently, Binance has released a white paper on BSC, a Binance smart chain. So, what can I get by staking through Binance Coin BNB?
- [H2] Various platforms are in Ethereum. So why is Kava not at Ethereum?
- [H2] What are ways by which Kava project generates profit/revenue to maintain project. What is your revenue model?

SEO Content

- [H2] Lending/Borrowing has been introduced by Binance. How can this affect the Kava since people can directly borrow BUSD from Binance with BNB used as collateral than going to Kava?
- [H2] What's your opinions on Future of DeFi & DApps? Do you think that DeFi is the future of current Financial world? Also, How do you see the future of KAVA?
- [H2] Recently, we have seen some big hacks in DeFi platforms. How will KAVA deal with these bad actors of crypto and what security measures have been taken by KAVA for the safety of users' funds?"
- [H2] Binance for KAVA is a very valuable partner in terms of increasing the number of users, but what is KAVA ready to give equivalent to Binance users? What applications will be integrated into Binance to expand the ecosystem?
- [H2] Cosmos has limitations on working with PoW coins. How do you technically solve the problem of implementing DeFi products for bitcoin?
- [H2] USDX is currently a little-known stable coin. Do you plan to add it to the top exchanges with good liquidity, including Binance?
- [H2] There are several options for using USDX on the KAVA platform, one of which is Margin Trading / Leverage. Is this a selection function or a compulsory function? Wondering since there are some investors who don't like margin. What is the level of leverage and how does a CDP auction work?
- [H2] Will your team have a plan to implement the DAO module on your platform, as it provides autonomy, decentralization and transparency?
- [H2] How can we address the possible overloads and security threats caused by increased users in the DeFi scene?
- [H2] What distinguishes Kava from your existing competitors like Syntetix?
- [H2] Why is the KAVA coin not used for Mint, why am I asking that because I see it can also make the value of KAVA coins grow naturally?
- [H2] How do you prevent in a manipulated KAVA Mint just to take advantage of a token prize when minting?
- [H2] Who are your oracle providers? Are you also an oracle provider?
- [H2] If we look at all the different types of DeFi products _(decentralized exchanges, stablecoins, atomic swaps, insurance products, loan platforms, trade financing platforms, custody platforms, and crowdfunding platforms) currently covering important areas of traditional finance...where does Kava fit in?
- [H2] Many people describe Kava as similar to Maker (MKR). How is Kava different? Why do you think Kava has more potential?
- [H2] What is the uniqueness of KAVA project that cannot be found in other project that's been released so far ?
- [H2] The gas fee is an issue for blockchain besides scalability. Does your Kava provide a solution for gas?
- [H2] Kava project works on DeFi (Decentralized Finance) But what's the benefits of Decentralized Financial system? What are the possibilities of DeFi over Centralized Finance system?
- [H2] Data supplied by oracles are false at times, how do you

SEO Content

prevent this? How reliable are data received by KAVA?

- [H2] Can anyone become a KAVA validator, or is it just an invitation from the project itself? What are the requirements for becoming a KAVA verifier?
- [H2] DEFI PULSE said that a total of 902M is currently locked. According to you, how will this number change in the next few years, and how will KAVA position itself as the top player in this market segment?
- [H2] I am an testnet minter and the process seem Simplified, now I want to know if minting of USDX will continue when you launch Mainnet and do you have plans to build your own KAVA WALLET for easy minting on your mainnet
- [H2] What business plans does Kava have with Seoul (South Korea) after partnering with Cosmostation? Do you plan to expand your products beyond Asia? Have you thought about harnessing the potential of South America?
- [H2] Thank you for taking the time to conduct this AMA. Do you have any parting words, and where can the people go to keep up with all of the new happenings regarding Kava Labs?
- [H2] How do you think about France in Kava market development plan?
- [H2] What is your next plan to raise awareness among French about Kava?
- [H2] Why did you choose Cosmos instead of Aion, which comes with AVM built on JAVA, which can be accepted by many developers?
- [H2] Will there be a possibility that one day we will be able to collateralize a privacy coin, such as Monero, on KAVA?
- [H2] The biggest advantage of finance is the efficient allocation of resource allocation. If KAVA connects assets of multiple platforms through the interchain technology, the efficiency across the market will be improved.
- [H2] But in terms of connectivity, Facebook's Libra, with its centralized giant platform, could be a big threat for the future. Of course, regulatory uncertainty still exists. KAVA wonders what big platform companies think about entering the blockchain field and how they can cope with their competition.
- [H2] What will you do with the money after IEO?
- [H2] What is the most important markets that Kava is focusing?
- [H2] What is your marketing strategy to approach those markets?
- [H2] On mainnet, which function/feature can we expect to see on Kava since i only saw informations about its testnet?
- [H2] How does Kava maintain the stability of its stablecoin? Are there any opportunities for outsiders to arbitrage or any other mechanisms to maintain price stabilization?
- [H2] Alright! So KAVA is doing DeFi right, could you explain DeFi in layman term to us.
- [H2] Could you please briefly explain your projects, and why you choose DeFi as a problem to solve?
- [H2] Why the name of the project KAVA?
- [H2] What do you think of the future of DeFi in this space? Will DeFi one day take over the traditional financial systems? -- any wild guess on when it might happen?
- [H2] As we have known, Lending is not the only problem to solve in the whole financial areas, are you planning on going

SEO Content

beyond lending? What other financial products are in your pipeline?

- [H2] Btw KAVA is a bit unique because it use Cosmos/Tendermint. While other DeFi use Ethereum , why you guys choose Cosmos?
- [H2] I saw in KAVA deck that you guys will use USDX, is it a stable coin? How is it going to work and its relationship with KAVA token itself?
- [H2] From your point of view as KAVA team, what would be most anticipated feature in KAVA ?
- [H2] Indonesia is one of the “developing” countries, how is DeFi can help in making a difference in those “developing” countries?
- [H2] Last but no least, since we are doing AMA in Indonesian group, I believed our members wants to know if you are interested in going to Indonesia to expand your community and reach?
- [H2] Defi companies are growing at a rapid pace, but they're actually smaller than traditional financial institutions. In order for Defy to become a global trend, it must eventually acquire consumers within the traditional financial industry.
- [H2] Traditional financial consumers, however, have poor technical understanding and want psychological stability through government guarantees such as deposit insurance. After all, what does KAVA think about long-term competitors as traditional financial institutions, and what long-term strategies do they have to embrace traditional financial consumers?
- [H2] MakerDAO is only for ethereum but Kava support multiple assets, is this only difference?
- [H2] What are Kava main advantages compared to MakerDAO?
- [H2] Ticket claim for KAVA Launchpad is comming around the corner. This maybe last IEO ticket claim of this year. With this hype and expectation of investors/traders, do you think KAVA will be a big boom to end this year with happy tears?
- [H2] If someone wants to manipulate Governance function of KAVA by changing voting result by possessing many Validators Node through buying over 51% KAVA of market, what will KAVA team do? Do you think Emergency Shutdown(Maker has this) can be considerd as a solution?
- [H2] How will USDX be minted and backed on KAVA platform? If its based on uses crypto collateral, how will KAVA team make it stable since the inflation of crypto price?
- [H2] Stablecoin is the word that I heard everyday, so do you have any plans to release wallet for stablecoin?
- [H2] My first question is: Why do traders choose to use KAVA instead of margin on exchanges?
- [H2] My second #Q is: What happens whenKAVA doesn't have enough cash to loan out?
- [H2] i heard as you said before in San Fransisco, Silicon Valley. what is the relationship about Silicon Valley and KAVA? and what will KAVA done in this Q1 ?
- [H2] With regard to minting new USDX, is there any potential chance to against Global financial law? Likewise USDT, issuing money should guarantee deposit of real collateral as I have known.
- [H2] What is the uniqueness of KAVA project that cannot be

SEO Content

found in other project that's been released before?

- [H2] KAVA was initially planned to launch on Ripple network but later switched to Cosmos Tendermint Core. What is that something you see in Tendermint Core that is not available anywhere.
- [H2] How much portion of USDX is backed from crypto/fiat money ...& please mention why any trader, hodler will prefer USDX over other stable coins?
- [H2] What are the biggest challenges you expect to face and how do you plan to overcome these challenges?
- [H2] What do you think about creating liquidity for the Kava project?
- [H2] So many IEO projects consistently drop in price after listing. What's different with KAVA, what are some special highlights?
- [H2] How do you see the Chinese language community? How do you view the opportunities for growth in the Chinese community?
- [H2] If we take a look at all the different types of DeFi products/apps out there, including decentralized exchanges, stablecoins, atomic swaps, insurance products, lending platforms, trade financing platforms, custodial platforms, crowd investment platforms, etc, nearly cover all the important areas of traditional finance.
- [H2] In this age of all these different platforms taking hold, where does Kava see itself appealing to its app developers, users, investors?
- [H2] How does Kava maintain the stability of its stablecoin? Are there any opportunities for outsiders to arbitrage or any other mechanisms to maintain price stabilization?
- [H2] What would you be able to do more for Russian-speaking communities and regions?
- [H2] What are your major goals to archive in the next 3-4 years? Where can we KAVA ecosystem in this period? What are your plans to expand and gain more adoption?
- [H2] Do you guys feel satisfied by seeing your progresses and achievements till now, when you look back to the day when you have started this project?
- [H2] Which one of your milestones do you think was difficult and which was the encouragement that encourages you to achieve it?
- [H2] What were the Minimum and Maximum limit of KAVA tokens that one can be able to STAKE after the Mainnet launch? And What will be the percentage of reward one gets and will it in future?
- [H2] What if someone fails to repay the debt? Is that KAVA is taking collateral system to enterprise level & if so, what's the plan? How secure KAVA is to safely handle the collateral tokens?
- [H2] I am very impressed with your voting method, how does it work? Whether users can vote to change things in the platform, are you a programmer with filters to decide what can be voted on and what is not possible?
- [H2] Where does the interest rate come from for holding USDX specifically & technically?
- [H2] As far as I understand it Kava is used both as a staking token and as collateral for Kava stablecoins (USDx). Can you

SEO Content

talk a bit about the stability mechanism? Can other forms of collateral be used to create Kava stablecoins (a la Multi-Collateral Dai)?

- [H2] As far as I know, KAVA had 150 Validators in the test. Why do you have so much. Which conditions are your team based on to choose / invite them to stay decentralized, important for a Defi platform like KAVA?
- [H2] As a developer, which program languages can i use in kava core smart contracts?
- [H2] 2How secure your fully on-chain liquidity protocol & What's is a core Smart Contract ?can you briefly explain.
- [H2] What do you think of DEFI in the Blockchain space?
- [H2] DeFi brings many benefits to users, but conflicts of interests with the Bank. What is the solution of kava?
- [H2] What is the crucial thing, in your opinion,that would increase adoption of KAVA and possibly the rest of crypto. What's the KAVA economic model and how will it is architecture ensure scarcity of the token and help to growth token price?
- [H2] Can you tell me more about the new technology that combines the benefits and interactive functions of Cosmos with the DeFi applications you have built?
- [H2] As Per Kava website ! \$KAVA was done many partnerships with Big project like Ripple, Cosmos, TenderMint, Hashkey, etc ! So, whats the major reason and benefits of these partnerships to kava project?
- [H2] Kava Project have their own Mainnet Blockchain So, whats the main work of Cosmos Blockchain in Kava ? Is Kava projects is on Both mainnet and Cosmos OR Kava is just using the Cosmos Blockchain services?
- [H2] I have been too involved in KAVA's AMA, I think I know all about your technology.I want to ask a successful person like you why come with cryptocurrencies and blockchain, with talent. There are many other areas for you to choose, so why are you targeting such a risky market?
- [H2] What's the most critical and innovative point of KAVA to ensure users that it is the best under DeFi niche?
- [H2] How can you compete MakerDAO which has done good number of business with recent market! If I hold KAVA tokens how KAVA leverage the tokens value and make it moon for me?
□□
- [H2] Why KAVA needs to create it's own stable coin, whereas there are are many other options available in the market? Is that crypto tokens can be stable!?!?
- [H2] Processing fees on loans we need to pay in kava or usdx?
- [H2] Which types of success you've been seen in testnet? Why on Nov 5th you've planned to launch mainnet? How many testnet was processed in the past?
- [H2] DeFi is a hot niche when it comes to crypto/blockchain project! Most of the projects are developing aiming DeFi, How KAVA is looking to contribute in DeFi ecosystem? What will be the approach of KAVA to systemize & increase adoptability?
- [H2] What is the main reason that you think that Cosmos-based Kava zone will present a new validator opportunity :- a complex and multi-faceted governance system that allows differentiation?
- [H2] How is kavas tendermint better than other defi consensus
