deliver an actionable set of socially, culturally, and contextually appropriate operational procedures. Azizi Life has since generated the funds to expand to a second location.

- [H4] Used Salesforce and MS Excel to help a CFP automate standard forecasts for portfolio performance, streamlining the portfolio evaluation process and more efficiently compiling client records.
- [H4] Utilized PHP and SQL-based platforms to build websites that helped businesses grow brand awareness, improve customer inflow, and ultimately increase revenue. Notable Project: created a portal for the Bergen County, NJ Counselors Association that automated procedures and facilitated online collaboration among its 400+ current members
- [H4] Paired statistical analyses with various Python libraries to create a pipeline that could extrapolate the performance metrics of candidate materials in real time, while their properties were being recorded. This helped materials engineering PhDs optimize a series of data handling steps, minimizing processing times from an hour to seconds.
- [H4] Prototyped components for industrial applications using Solidworks® and MakerBot 3D printers.
- [H4] Led a team of four engineering students to leverage optimization tools in MS Excel to improve the yield and the electrical properties of piezoelectric nanowire arrays - used for applications in nerve implants and micro- power generators.
- [H4] Optimized the data cleansing and analysis process for researchers exploring brain-to-computer interfaces by organizing and leading a team that built a Python-based, EEG (electroencephalogram) brain signal processing pipeline.
- [H4] Founded a platform to connect university students based on their courses, enabling for more diverse and effective study groups.
