Your website does not have an XML sitemap - this can be problematic.

A sitemap lists URLs that are available for crawling and can include additional information like your site's latest updates, frequency of changes and importance of the URLs. This allows search engines to crawl the site more intelligently.

	Robots.txt	Missing
		Your website doesn't have a robots.txt file - this can be problematic. It also specifies where the XML sitemap file is located.
	Analytics	Missing
