- [H1] Securrency
- [H1] Delivery vs Payment (DvP)
- [H1] J.P.Morgan's Coin
- [H2] Kava is a decentralized DEFI project, why did you implement the countries restrictions to run the node? Will there be such restrictions by the time of the mainnet?
- [H2] According to the project description it has been indicated that staking reward (in KAVA tokens) varies from 3 to 20% per annum. But how will you fight with inflation?
- [H2] We all know how altcoins prices are falling, and their bottom is not visible. And in fact, we can get an increase in the number of tokens for staking, but not an increase in the price of the token itself and become a long-term investor.
- [H2] In your allocation it is indicated that 28.48% of the tokens are in the "Token treasury" - where will these tokens be directed?
- [H2] Such a platform (with loans and stable coins) is just the beginning since these aspects are a small part of many Defi components. Will your team have a plan to implement other functions, such as derivatives, the dex platform once the platform is successfully launched?
- [H2] There are several options for using USDX on the KAVA platform, one of which is Margin Trading / Leverage. Is this a selection function or a compulsory function? Wondering since there are some investors who don`t like margin. What is the level of leverage and how does a CDP auction work?
- [H2] Most credit platforms do not work well in the current market. What will you do to attract more people to use your platform and the services you provide? Thank you
- [H2] KAVA functions as a reserve currency in situations where the system is undercollateralized. In such cases new KAVA is minted and used to buy USDX off the market until USDX becomes safely overcollateralized.
- [H2] Meaning, there will be no max supply of KAVA?
- [H2] Why Kava?
- [H2] How do you plan to make liquidity in Kava?
- [H2] Most crypto investors or crypto users prefer easy transaction and low fees, what can we expect from KAVA about this?
- [H2] How do I become a note validator on KavA?
- [H2] It is great to know that KAVA is the first DEFI-supported project sponsored by Binance Launchpad, do you think this is the meaning that CZ brings: Opening the DEFI era, as a leader, you feel like how ?
- [H2] Since decentralized finance applications is already dominating, how do you intend to surpass those leading in the market?
- [H2] What does Ripple play in the Kava's ecosystem, since Ripple is like a top tier company and it's impressive that you are partnered with them?
- [H2] Considering the connectivity, Libra could be the biggest competitor if KAVA leverages interchain for efficiency.
- [H2] Wonder how KAVA will compete with the tech giants
- [H2] In long-term, what's the strategy that KAVA has for covering the traditional finance users as well? Especially regarding the "stability"

SEO Content

- [H2] In long-term, what's the strategy that KAVA has for covering the traditional finance users as well? Especially regarding the "stability"
- [H2] Compound, maker they're trying to increase their size via the competitive interests rates. THough it shows good return in terms of growth rate, still it's for short-term. Wonder other than financial advantage, KAVA has more for the users' needs?
- [H2] The vast majority of the cryptocurrency community's priorities is symbolic pricing. When prices rise, the community rejoices and grows. When they fall, many people begin to cast in a negative way. How will KAVA solve the negative problem when the price goes down? What is your plan to strengthen and develop the community to persuade more people to look at the product than the price?
- [H2] Do you have any plans to attract non-crypto investors to Kava and how? What are the measures to increase awareness of kava in non-crypto space?
- [H2] Adoption is crucial for all projects and crypto companies, what strategy are you gonna use/follow or u are now following to get Kava adopted and used by many people all over the world?
- [H2] Revenue is an important aspect for all projects in order to survive and keep the project/company up and running for long term, what are the ways that Kava generates profits/revenue and what is its revenue model?
- [H2] In order to be success in Loan project of Cryptocurrency, I think marketing is very important to make people using this service without any registration. What is main strategy for marketing?
- [H2] Currently, some project have policies for their ambassadors to create a contribution and attract recognition for the project! So the KAVA team plans to implement policies and incentives for KAVA ambassadors?
- [H2] Currently there are so many KAVA tokens sold on exchanges, why is this happening while KAVA is going to IEO on Binance? Are those KAVA codes fake or not?
- [H2] KAVA have two tokens, the first is called Kava - a governance and staking token; the second is called USDX - an algorithmically managed crypto-backed stable coin. What are the advantages of USDX compared to other stablecoins such as: USDT, USDC, TUSD, GUSD, ...?
- [H2] As a CEO, does your background in Esports and Gaming industry help anything to your management and development of KAVA Labs?
- [H2] Why did Kava choose to launch IEO on Binance and not other exchanges like: Kucoin, Houbi, Gate, ...?
- [H2] Currently if Search on coinmarketcap has 3 types of stablecoins bearing the USDX symbol (but these 3 stablecoins are no information). So, what will KAVA do to let users know that Kava's USDX is another stablecoin?
- [H2] In addition to the Token Allocation for Binance Launchpad, what is the Token Treasury in the Initial Circulating Supply?
- [H2] How you will compete with your competitors? Currently i don't see much but for future how you will maintain this consistency ? No doubt it is Great and Unique project, what is the main problem that #KAVA is currently facing?

SEO Content

- [H2] How do you explain your project to a random person who has never heard of your project?
- [H2] Will KAVA team have a plan on implementing DAO module on your platform since its efficiency on autonomy, decentralization and transparency?
- [H2] how to use usdx token :only for your platform or you have plan to use usdx for payment ?
- [H2] Do you have plans to spread KAVA ecosystem across other continents. if yes, what are the strategies and how can I as a community member contribute to making it possible?
- [H2] Maker's CDP lending system is on top in this market and its Dominance is currently sitting on 64.90 % , how kava will compete will maker and compound?
- [H2] Currently, the community is too concerned about the price. As prices rise, the community rejoice and grow, when falling, many people start throwing negatively. So what is KAVA's solution to getting people to focus on the project rather than the price of the token?
- [H2] What is your plan to strengthen and grow the community to persuade more individuals to look at the product than the price?
- [H2] How did Kava get on Piexgo?
- [H2] Why was the 1st round price so much lower than the current price
- [H2] What is the treasury used for?
- [H2] Everyone have heard about the KAVA token, and read about it. But it would be great to hear your explanation about it. What is the Kava token, what is it's utility? :)
- [H2] No matter how perfect and technically thought-out a DeFi protocol is, it cannot be completely protected from any unplanned situations (such as extreme market fluctuations, some legal issues, etc.)
- [H2] Ecosystem members, in particular the validators on whom KAVA relies on fundamental decision-making rights, should be prepared in advance for any "critical" scenario. Considering that, unlike the same single-collateral MakerDAO, KAVA will be a multi-collateral CDP system, this point is probably even more relevant here.
- [H2] In this regard, please answer the following question: Does KAVA have a clear risk management model or strategy and how decentralized is / will it be?
- [H2] Did you know that "Kava" is translated into Ukrainian like "Coffee"? I personally do love drinking coffee. I plunge into the fantasy world. Why did you name your project "Kava" What is the story behind it? What idea / fantasy did your project originate from, which inspired you to create it?
- [H2] What incentives does a lender get if a person chooses to pay with KAVA? Is there a discount on interest rates on the loan amount if you pay with KAVA? Do I have to pass the KYC procedure to apply for a small loan?
- [H2] Let's say, I decided to bond my cryptocurrency and got USDX stable coins. For now, it`s an unknown stable coin (let's be honest). Do you plan to add USDX to other famous exchanges? Also, you have spoken about the USDX staking and that the percentage would be higher than for other stable coins. Please be so kind to tell us what is the average annual

interest rate and what are the conditions of staking?
- [H2] Why should i use and choose Kava's loan if i can use the similar margin trade on Binance?
- [H2] The IEO price is $ 0.46 while the price of the first private sale is $ 0.075. Don't you think that such price gap can negatively affect the liquidity of the token and take away the desire to buy a token on the exchange?
- [H2] Can you introduce some information abouts KAVA Deflationary Fee Structure? With the burning mechanism, does it mean KAVA will never reach its max supply?
- [H2] In your opinion what are advantage of decentralized finance over centralized?
- [H2] Plan, KAVA how to raise capital? Kava is being supported by more than 100 business entities around the world, including major cryptocurrency investment funds like Ripple and Cosmos, so what did kava do to convince investors to join the project?

Optimization

	XML Sitemap	Missing Your website does not have an XML sitemap - this can be problematic. A sitemap lists URLs that are available for crawling and can include additional information like your site's latest updates, frequency of changes and importance of the URLs. This allows search engines to crawl the site more intelligently.
	Robots.txt	http://sidebtdazzlofals.tk/robots.txt Great, your website has a robots.txt file.
	Analytics	Missing We didn't detect an analytics tool installed on this website. Web analytics let you measure visitor activity on your website. You should have at least one analytics tool installed, but It can also be good to install a second in order to cross-check the data.
